LOGO SPECIFICATION · V1.0

ThumbStall

Pause the reel. Play your life!

Mark
H8 · Time Ring

Platform
Android (adaptive, themed, splash)

Date
5 November 2026

01 · THE IDEA

A paused reel inside a timer ring

ThumbStall is a free, open-source Android app that helps everyday users cut doomscrolling on Reels, Shorts and TikTok without giving up their phone. The mark combines the three things the app does: it recognises the **reel**, puts a **pause** in front of it, and keeps track of **time**.

1 · Timer ring
A faint full track with a bright arc covering three-quarters, starting at 12 o'clock and running clockwise. It stands for the daily short-video allowance.

2 · Film reel
A solid disc with six round cut-outs. It is the universal sign for film and video, so it reads as "reels" without using any platform's logo.

3 · Pause hub
The reel's hub is a pause symbol. The reel is not destroyed or blocked, just paused, which matches the app's gentle-friction approach.

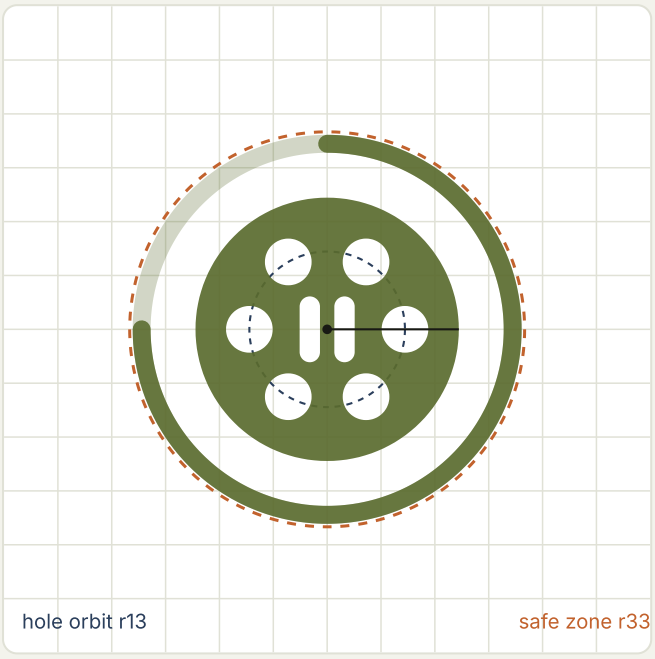

Why it works

- **Says what the app does.** Reel + pause + time maps directly to the core features: the pause screen, feed filtering and the shared short-video allowance.
- **Calm, not punishing.** No stop signs, locks or crosses. The research behind the app shows gentle friction keeps users longer than hard blocks.
- **Becomes a live UI element.** In the icon the ring is fixed at 75%. Inside the app the same ring fills and drains with the user's real allowance, so the logo and the feature are one object.
- **Holds up small.** Simple geometry, a solid reel and cut-outs keep it legible at 44 px and as a one-colour themed icon.

02 · GEOMETRY

Construction on the 108 grid

All values are in units of the Android adaptive-icon canvas: **108 × 108**, centre **(54, 54)**. The whole mark sits inside the 66-unit safe zone (radius 33), so no launcher mask can clip it.

Element	Value
Ring track	Circle r **31**, stroke **3**, colour = mark at **30%** opacity
Ring arc	r 31, stroke 3, round caps, from **(54, 23)** clockwise **270°** to **(23, 54)**. Path `M54 23 A31 31 0 1 1 23 54`
Reel disc	Circle r **22**, solid fill
Reel holes	6 × circle r **3.9** on orbit r **13** at 0°, 60°, 120°, 180°, 240°, 300°. Centres: (67, 54), (60.5, 65.26), (47.5, 65.26), (41, 54), (47.5, 42.74), (60.5, 42.74). Cut-outs, not painted.
Pause bars	2 × rect **3.4 × 11**, radius 1.7, at x **49.4** and **55.2**, y **48.5**. Cut-outs.
Overall	Outer edge of ring = r 32.5 (inside safe zone r 33). Visual centre = canvas centre.

Small-size adjustments

Rendered size	Ring stroke	Notes
132 px and up	3.0	Master geometry
~104 px	3.2	Default launcher size on most phones
~72 px	3.8	Settings lists, share sheets
44 px and below	4.6	Widgets, small lists. Below 32 px use the reel-only glyph (page 7).

03 · COLOUR

Olive palette

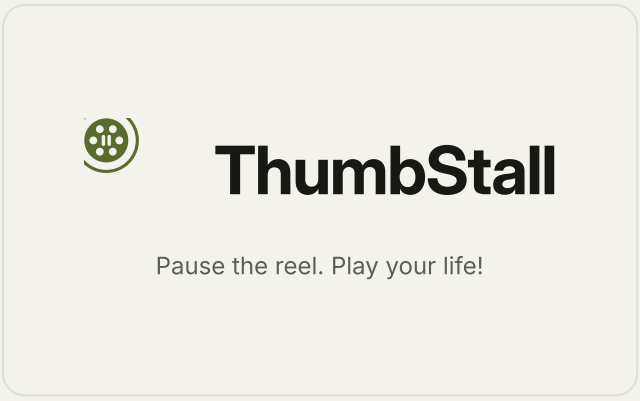

The brand and app share one palette. The icon uses only Olive 600 and Cream; the rest supports the wordmark, splash and UI.

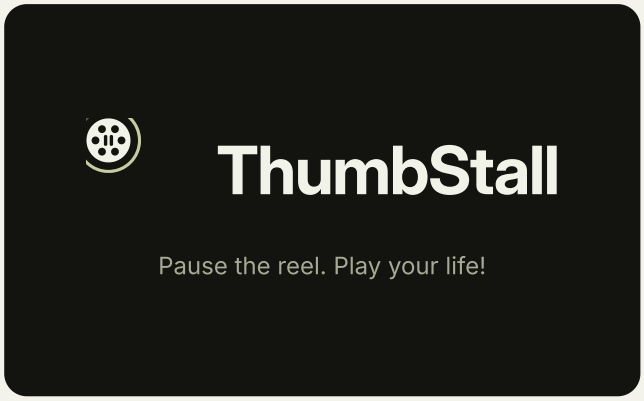

Swatch	Hex	Role
Olive 600	`#5A6B2E`	Icon tile, primary buttons, mark on light backgrounds
Olive 800	`#3F4B1F`	Dark accent text, pressed states
Olive 300	`#C5CC9E`	Ring arc on dark backgrounds, light chart bars
Olive 100	`#ECEEDC`	Soft fills, info cards, chips
Cream	`#F1F2E8`	Mark on olive tile, text on dark
Paper	`#F3F3EC`	Light app background
Ink	`#181914`	Primary text, wordmark on light
Muted	`#5C6052`	Secondary text on light
Night	`#13140F`	Splash and pause-screen background
Rust (optional)	`#C2622D`	Optional accent for the ring arc in marketing only. Not used in the default icon.

Contrast checks (WCAG)

Pair	Ratio	Use
Cream on Olive 600	5.2 : 1	Icon mark, text on buttons (passes AA)
White on Olive 600	5.9 : 1	Button labels
Olive 600 on Paper	5.3 : 1	Mark and links on light
Ink on Paper	15.9 : 1	Body text
Muted on Paper	5.8 : 1	Secondary text
Cream on Night	16.4 : 1	Splash wordmark
Olive 300 on Night	11.0 : 1	Ring arc on dark

Lockup

Type

Use	Typeface	Settings
Wordmark	**Bricolage Grotesque** Bold (700), Google Fonts, SIL OFL	Written "ThumbStall" (camel case, one word). Tracking −2.3%. Optical size: display.
Headings in app	Bricolage Grotesque Bold	Tracking −1% to −2%
UI and body	**Inter** 400 / 500 / 600, SIL OFL	Default tracking

Note: the wordmark samples in this PDF are set in Inter Display Bold as a stand-in, because Bricolage Grotesque wasn't available when the PDF was built. Production artwork must use Bricolage Grotesque Bold.

Lockup rules

- **Mark height** in the lockup = 1.5 × wordmark cap height. Gap between mark and wordmark = 0.25 × mark height.
- **Clear space** on all sides = 0.25 × mark diameter (the ring's outer edge).
- **Minimum size:** mark alone 24 px (use reel-only glyph below 32 px); full lockup 120 px wide.
- **Light background:** mark Olive 600, wordmark Ink. **Dark background:** mark Cream with ring arc Olive 300, wordmark Cream.

Tagline

Pause the reel. Play your life!

Set in Inter Regular, sentence case, with the exclamation mark. Place under the lockup or alone in marketing. Don't change the wording or punctuation.

Icon in use

Launcher shapes

Circle Squircle Rounded 44 px

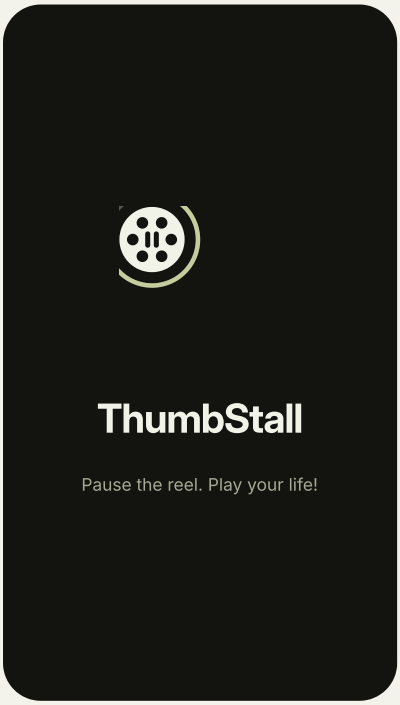

Themed icon (Android 13+)

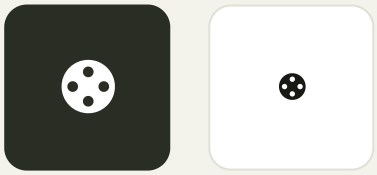

Blue wallpaper Warm wallpaper Dark mode

The monochrome layer is the same vector in a single colour. The system tints it; keep the track at 30% alpha.

Splash screen

Status-bar and notification glyph

Below 32 px the ring becomes too thin, so use the **reel-only glyph**: disc r30, four holes r6 on orbit r17.5, white on transparent, 24 dp. Android requires small notification icons to be a single colour.

06 · USAGE

Do and don't

DO

Cream mark on the Olive 600 tile

DO

Olive mark on Paper or white

DO

Cream mark, Olive 300 arc on Night

DON'T

Rotate the mark or move the arc's start away from 12 o'clock

DON'T

Add gradients, shadows or glows

DON'T

Stretch, squash or skew

DON'T

Fill the ring to 100% in the static icon (it reads as a plain circle)

DON'T

Use low-contrast pairings

DON'T

Add text, letters or platform logos to the mark

In-app behaviour of the ring

- The **static** icon always shows the arc at 75%.
- Inside the app, the ring is a **live indicator**: it shows the share of today's short-video allowance that's left, starting full in the morning and draining clockwise-to-empty as it's used.
- On the pause screen the ring can count down the breathing pause (for example 10 s), then the pause bars fade as the choices unlock.
- Animate with calm easing (ease-in-out, 400–600 ms). No bounces, flashing or red warning states.

07 · SOURCE FILES

Master SVG

Mask-free master. Holes and pause bars are cut out with `fill-rule="evenodd"`, so it renders the same in browsers, Figma and Android Studio's Vector Asset import. Remove the background `rect` for the foreground-only layer.

```
<svg xmlns="http://www.w3.org/2000/svg" viewBox="0 0 108 108">
  <!-- Background layer -->
  <rect width="108" height="108" fill="#5A6B2E"/>
  <!-- Ring track (30% of mark colour) -->
  <circle cx="54" cy="54" r="31" fill="none" stroke="#F1F2E8" stroke-opacity="0.3" stroke-width="3"/>
  <!-- Ring arc: 270° clockwise from 12 o'clock -->
  <path d="M54 23 A31 31 0 1 1 23 54" fill="none" stroke="#F1F2E8" stroke-width="3" stroke-linecap="roun

</style>
```

On the dark splash, swap the arc colour to Olive 300 (`#C5CC9E`) in a splash-specific copy of the foreground vector. Optional animation: sweep the arc from 0° to 270° over 500 ms, then fade in the pause bars.

Checklist for implementation

Deliverable	Spec
Adaptive launcher icon	Background Olive 600, foreground vector from page 9, monochrome layer for Android 13+ themed icons
Play Store icon	512 × 512 PNG, 32-bit, master SVG with background, no transparency, no extra rounding (Play applies the mask)
Legacy launcher icons	mipmap-mdpi 48, hdpi 72, xhdpi 96, xxhdpi 144, xxxhdpi 192 px, exported from the master SVG
Notification icon	`ic_stat_thumbstall`, 24 dp vector, reel-only glyph, white on transparent
Splash	SplashScreen API, Night background, foreground vector with Olive 300 arc
Wordmark	Bricolage Grotesque Bold, "ThumbStall", tracking −2.3%, convert to outlines for SVG/PNG exports
Tagline	"Pause the reel. Play your life!" in Inter Regular
In-app ring component	Same ring geometry, arc length bound to remaining allowance (0–100%), track at 30% alpha, round caps, starts at 12 o'clock, clockwise
Fonts licensing	Both fonts are SIL Open Font License 1.1, compatible with a GPL-3.0 app; include the OFL text in the repository
